The Buyer may have the building's energy-efficiency rating determined, and the Buyer should receive a copy of the information brochure prepared and provided at no cost by the Department of Community Affairs at the time of, or prior to, the Buyer's execution of the contract. If you did not receive one, please ask for it. The Brochure will provide information 1) How to analyze the building's energy-efficiency rating, (2) comparisons to statewide averages for new and existing construction of that class, (3) information concerning methods to improve the building's energy-efficiency rating, (4) that the energy-efficiency rating may qualify the residential purchaser for an energy-efficient mortgage from lending institutions.

RADON GAS AND OTHER ENVIRONMENTAL RISKS

Radon is a naturally occurring radioactive gas that, when it has accumulated in a building in sufficient quantities, may present health risks to persons who are exposed to it over time. Levels of radon that exceed Federal and State guidelines have been found in buildings in Florida. Additional information regarding radon and radon testing may be obtained from county public health units. ***Some other common hazardous substances found in existing housing are asbestos, lead, urea formaldehyde foam insulation, mold and Chinese drywall***. Most buildings built before 1950 contain lead in existing paint and plaster, almost half of those buildings built between 1950 and 1980 contain lead in existing paint. In buildings built between 1982 and 1988 the tap water may contain lead from solder used for plumbing pipes. Lead is poisonous if consumed. Lead contamination may occur by eating lead paint chips, by breathing lead dust from plaster and paint and by drinking contaminated water. If lead contaminated products are present in the building, precautions should be taken to reduce risk of lead poisoning especially if any occupant is pregnant or young; and if any renovations are contemplated. Risk of drinking water contamination from environmental sources is also possible, if water source is supplied to the property by a private well. Mold is part of the natural environment that, when accumulated in sufficient quantities, may present health risks to susceptible persons Properties that have had water penetration are susceptible to mold contamination. Additional information regarding lead and other environmental risks may be obtained from any public health unit, from the Department of Veteran Affairs or from the Department of Housing and Urban Development.

DISCLOSURE OF INFORMATION ON LEAD-BASED PAINT AND/OR LEAD-BASED PAINT HAZARDS

Lead Warning Statement

Every Buyer of any interest in residential real property on which the residential dwelling was built prior to 1978 is notified that such property may present exposure to lead from lead-based paint that may place young children at risk of developing lead poisoning. Lead poisoning in young children may produce permanent neurological damage, including learning disabilities, reduced intelligence quotient, behavioral problems, and impaired memory. Lead poisoning also poses a particular risk to pregnant women. The Owner of any interest in residential real property is required to provide the Buyer with any information on lead-based paint hazards from risk assessments or inspections in the Owner's possession and notify the Buyer of any known lead- based paint hazards. A risk assessment or inspection for possible lead-based paint hazards is recommended prior to purchase or lease.

PROPERTY TAX DISCLOSURE SUMMARY

BUYER SHOULD NOT RELY ON THE SELLER'S CURRENT PROPERTY TAXES AS THE AMOUNT OF PROPERTY TAXES THAT THE BUYER MAY BE OBLIGATED TO PAY IN THE YEAR SUBSEQUENT TO PURCHASE. A CHANGE OF OWNERSHIP OR PROPERTY IMPROVEMENTS TRIGGERS REASSESSMENTS OF THE PROPERTY THAT COULD RESULT IN HIGHER PROPERTY TAXES. IF YOU HAVE ANY QUESTIONS CONCERNING VALUATION, CONTACT THE COUNTY PROPERTY APPRAISER'S OFFICE FOR INFORMATION

ANY STATEMENTS OR REPRESENTATIONS WHICH MAY CONFLICT WITH THESE KEYES DISCLOSURES MAY NOT BE RELIED UPON.

Always independently verify wiring instructions sent via email

Criminals/hackers are targeting email accounts of various parties involved in real estate transactions (e.g., lawyers, title agents, mortgage brokers, real estate agents). These emails are convincing and sophisticated. Among other concerns, this has led to fraudulent wiring instructions being used to divert funds to the criminal's bank account. These emails may look like legitimate emails from the proper party. If you receive an email regarding instructions that contains any suspicious information, do not click on any links that may be in the email and do not reply.

Broker strongly recommends that Buyer, Seller, and their respective attorneys and others working on a transaction, refrain from placing any sensitive personal and financial information in an email, directly or through an email attachment. When there is a need to share Social Security numbers, bank accounts, credit card numbers, wiring instructions or similar sensitive information, Broker strongly recommends using more secure means, such as providing the information in person, over the phone, or through secure mail or package services, whenever possible. **In addition, before Buyer or Seller wires any funds to any party (including Buyer or Seller's attorney, title agent, mortgage broker, or real estate broker) personally call them to confirm the information is legitimate (i.e., confirm the ABA routing number or SWIFT code and credit account number).** Buyer and Seller should call them at a number that is independently obtained (e.g., from this Contract, the recipient's website, etc.) and not use the number in the email in order to be sure that the contact is a legitimate party.
